DETAILED ACTION

REJECTIONS WITHDRAWN

1. There are no rejections withdrawn.

REJECTIONS REPEATED

2. All of the 102 and 103 rejections set forth in the non-final rejection of 11/3/05, pages 2-5, paragraphs 3-8. Applicant has added the limitation "obtained by the process of rotational molding" to claim 23. However, said limitation is a process limitation in a product claim and process limitations are not germane to the patentability of a product in a product claim (MPEP 2113). There is no claimed structural difference between the claim and the prior art therefore the claim is still anticipated as written.

NEW REJECTIONS

3. There are no new rejections.

ANSWERS TO APPLICANT'S ARGUMENTS

4. Applicant's arguments of 2/16/06 have been carefully considered but are deemed unpersuasive.

Applicant has added the limitation "obtained by the process of rotational molding" to claim 23. However, said limitation is a process limitation in a product claim and process limitations are not germane to the patentability of a product in a product claim

Art Unit: 1772

(MPEP 2113). There is no claimed structural difference between the claim and the prior art therefore the claim is still anticipated as written.

Applicant has argued that the references do not disclose a removable liner. However, it is well known in the art to provide a releasable liner for an article during packaging, transportation or storage.

Applicant has argued that the references do not disclose applicant's claimed thickness recited in claim 27. However, thickness is a well known result effective variable and finding the workable or optimum working range for a result effective variable is obvious (MPEP 2144) and it would have been obvious to have provided applicant's claimed thickness in order to add protection to the article and/or lower production costs by using less material.

Applicant has argued that the prior art does not teach a patchless shell for a medical device obtained by rotational molding. However, rotational molding is a process limitation in a product claim and process limitations are not germane to the patentability of a product in a product claim (MPEP 2113).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 1772

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
